The filing of the kodak case in the Supreme Court makes easily the most important group of cases before the court at any time with the possible exception of the period when the Standard Oil and tobacco cases were there. This is largely due to the fact that the court has handed down but one opinion touching the Sherman law in a year and a half.

Cases under the Sherman law now pending in court included those against the United States Steel Corporation, International Harvester Company, Eastman Kodak Company, South African steamship lines, New York woodworkers' case, United Mine Workers of America, and coal miners in Arkansas. The filing of the kodak case in the

FOR TEACHER PENSIONS.

Senator Pomerene Introduces Bill Calling for a Contributory Plan.

A bill providing for a retirement pen sion system for the public school teachers of the District was introduced in the Senate today by Senator Pomerene of Ohio. The bill calls for a go tributary plan, by which there shall be deducted from the salary of each deducted from the salary of each teacher every month an amount which, with compound interest at 4 per cent, shall be sufficient to make it possible to pay annuities to the teachers upon their retirement.

The age of sixty-two is set for retirement, if the teacher so desires, and it is obligatory that any teacher who reaches the age of seventy shall be retired. No annunity is to exceed \$600 a year. The bill was referred to the Senate District committee.

REFERS TO "HUMAN PETITION."

Secretary Daniels Speaks of New York Parade in Urging Preparedness NEW YORK, May 15 .-- As long as any nation exalts power the United States must be ready to preserve that for which our forefathers fought, Secretary of the Navy Josephus Daniels declared in an address on national preparedness here last night.

paredness here last night.

Congress soon will make a larger appropriation for the navy than at any time in the history of the country, the Secretary said.

"That great and wonderful human petition that marched on the streets of this city Saturday," he asserted, referring to New York's monster preparedness parade, "spoke louder than if twice that number had signed a paper. It attested that the American people love independence, that there is no eacrifice they would not make to maintain it."

secretary Daniels asserted he believed that it would remain for the
United States to find a way to end the
war throughout the world.
"I do not pretend to be wise enough
to know how this will be brought
about," he added, "but I hope that
when this struggle is ended this republic will have representatives at an
international conference which will
propose that nations find a way to settie disputes without recourse to
swords."

UNDER CLUB AUSPICES.

Meeting of Department of Commerce Employes This Evening.

There will be a mass meeting of the employes of the Department of Commerce at 8 o'clock tonight in the auditorium of the New National Museum, under the auspices of the newly formed Commerce Department Club. Secretary Redfield is scheduled to ad-

dress the gathering, and the officers of the organization will tell of the progress being made in the club's membership campaign. Music will be furnishe

ship campaign. Music will be turnished by the Bureau of Standards Orchestra and Glee Club.

For the benefit of the employes of the department, the roof of the building at 19th street and Pennsylvania avenue is being fitted up for recreation pur-poses. Carpenters now are laying the flooring, and soon an awning will be not up.

A lunchroom and some entertainment features will be added later.

Business was suspended yesterday and a number of the vice regents of the organization drove to Pohick, the parish church of Mount Vernon, for the Sunday service. The journey was made over the same toad that the family of George Washington drove over 150 years ago.

Crisp Granules

In making the food, Grape-Nuts, whole wheat and malted barley are ground into flour, blended, formed into a dough, and baked about 20 hours. This long baking converts a large part of the starch into dextrose or grape-sugar, making Grape-Nuts easily digestible-generally in about one hour,

Grape-Nuts comes from the ovens almost rockhard and is reduced to crisp, sweet, nutlike granules requiring thorough mastication. An admirable quality-both for good digestion and sound teeth.

Grape-Nuts

contains all the nutriment of the grains, including the valuable mineral salts-phosphate of potash. etc .- often lacking in the ordinary diet but so essential for well balanced nerves and sturdy bodies.

Grape-Nuts is ready to eat direct from the package with cream or good milk-a delicious, well balanced food for health, strength and efficiency.

"There's a Reason"

Grocers everywhere sell Grape-Nuts.

MISS FRANCESE WILLIAMS' **COMPANY IS PRIZE WINNER**

warded Badges for Proficiency in Drilling-Miss Dorothy Potter

Best Radio Operator. Miss Francese Williams, sister of Mrs. Joseph Leiter, is the proudest girl in the woman's camp today. .Company C. of which she is captain, won the prize drill and now all the members are vearing badges for general proficiency. There are three other Washington young woman officers of this company. Maj. Natalie Sumner Lincoln, Sergt. Annie Hopkins and Sergt. Hendricks. The drill sergeant was T. K. Owing of the United States Engineer Corps who was enthusiastic in praise of the way his "rookies" obeyed orders. Another very proud young woman is

Miss Dorothy Potter, who won honors as the best wireless operator in camp in a competative test in which eighteen participated. She is one of the color Miss Pauline Stone won second honors miss rauline Stone won second honors in radio, with Caroline Ogden-Jones third in the honor roll. These tests were given by Chief Electricians of the Navy A. A. Penland and H. L. Pitts. They say the girls have proved very bright in this branch of the National Service School

Why this Sale

of The Encyclopaedia Britannica

Must Close

AN ANNOUNCEMENT!

Very shortly we must withdraw our offer of the new "Handy Volume" Issue of the ENCYCLOPAEDIA BRITANNICA.

We were able to offer to our customers and the public the new "Handy Volume" Issue of the Britannica at such phenomenally low prices only by arranging with the publishers for an enormous printing and by reason of this a very heavy reduction in manufacturing costs.

All these contracts for paper, presswork, binding, leather, and so forth, were made before the war began.

The sale has been a success beyond the highest expectations. It is a conservative statement that no such a sale of a single work, either in the number of volumes or in the total sales price was ever known before in the history of book publishing.

We take pride in our achievement. We have placed in tens of thousands of homes a new edition of the most valuable work in the English language, the most useful, the most practical, and the most informed. We believe, and many distinguished educators have written to us to say, that we have done a distinct educational service.

We wish we could have gone on selling this great work at this low price for years. That is impossible. So rapidly has the issue been subscribed for that the sets now remaining will soon be exhausted.

The publishers now notify us that they cannot renew the present contract. So rapidly has the cost of production risen in the last few months that they cannot supply us with further sets at anything like present costs.

The price will have to be advanced from \$11 per set for the lowest priced bindings to \$19 per set for the highest price; and there is no certainty that we can arrange for many more sets even at this price.

The same sudden rise in prices which has occurred in many other lines of trade has come to the paper, printing and binding business. Paper has advanced between 60 and 70%, morocco leather 50%, ink from 20 to 150%, and other raw materials entering into the making of the Encyclopaedia Britannica much the same.

the United States. Prices in many lines have risen at an almost fabulous rate. A list is given in an adjoining column. Nor does this rise seem temporary. We seem entering upon an era of still higher prices and of rapidly expanding trade. The basic industry of the country, farming, is receiving high prices for all its products.

All this is only part of a great wave of prosperity that has come to

A heavy congestion of freight rules all over the country. There is a shortage of cars, and of locomotives to haul them. Industry is humming. Two-thirds of the factories of the nation are working overtime. Not in twenty years has the like been seen.

AN OPPORTUNITY PASSING

What is plain is that the opportunity to obtain the new edition of the Encyclopaedia Britannica at the present prices will not be repeated. In some of the more expensive bindings exhaustion is already near; and in the most expensive, the full seal binding, hardly a hundred sets remain.

We therefore give notice that in a very short time the sale will close, our offer will be withdrawn and the Britannica will be obtainable only at very much higher prices. There is still time to send for the handsome 130-page book described below, but we urge those who have been hesitating to forward their orders at the earliest possible time.

What This Vast Work Contains

When it is said that the new Eleventh when it is said that the new Eleventh Edition of the Encyclopaedia Britannica is the most exhaustive summary of human knowledge ever prepared, in a single work, this carries little suggestion of its vast range. It does not help much to say that it contains forty-one thousand different articles.

To take a few of its divisions. On Art, Architecture and Music there is a total of 2937 different articles; on Chemistry 547; on Languages and Writing 285; on Medicine

and Surgery 644.

The Britannica is a splendid atlas, and the total of its articles on Geography reaches 11,341. The number of articles on the History of Nations is 6292; on the different

History of Nations is 6292; on the different literatures of the world 4136.

Abstruse subjects like Philosophy and Psychology roll up a total of 643 articles; Religion and Theology 3049; Mathematics 253.

Sports and Pastimes show a total of 264 articles; Law and Political Science 1302; Engineering 419; Economics and Social Science 492.

Needless to say all the separate sciences.

Needless to say all the separate sciences are covered as completely as if you had separate text books for each; and in a far more compact and readable form. Biology, the science of life, has a total of 1886 articles; Geology, earth knowledge, a total of 740; Physics 285; Anthropology and Ethnology, covering all our knowledge of man upon the earth, 458 articles.

It is a highly practical work. Industries and Occupations are covered in 545 different articles; Military and Naval subjects in 320; Education in 172; Archæology and Antiquities in 161.

Just the mere text of the new Eleventh

Just the mere text of the new Eleventh Edition, printed in ordinary type would make three or four hundred volumes of average book size; and at a dollar and a half a volume this would mean they would cost at least four or five hundred dollars— that is, nearly ten times what the Britannica may be had for in the new "Handy Vol-

ume" Issue.

But this does not nearly tell the story.
You could not go to the biggest bookstore in the world and buy any thousand volumes. on all these separate subjects and get any-where near as complete and serviceable a where near as complete and serviceable a working library as the 29 volumes of the new Britannica. Many of its articles are of considerable length, 50 and 100 pages and more, but the most of them are crisp, clear summaries telling the average person pre-cisely what he or she wishes to know on

any given subject.

The new Eleventh Edition is in fact a miracle of compression and compactness, as it is of completeness and authority. It is not merely the product of the greatest of living minds, but every page of it has been boiled down to give the utmost service to the busy men and women of today.

WHAT OUR OFFER MEANS

- 1. We supply the "Handy Volume" Issue of the new Eleventh Edition at one-third the prices of the larger-paged "Cambridge University" issue of the same work.
- 2. You have the publishers' guarantee, and our own, that the volumes you have received are word for word, and line for line, the same as the "Cambridge University" issue, not an article or a single illustration omitted.

3. We ship you the complete work, the entire 29 volumes, for a first payment of only one dollar.

4. You then have three weeks in which to examine them and find out how valuable they may be in your home. 5. If for any reason whatsoever you do not wish to keep them, you may return

them and we will refund your dollar and all shipping charges as well 6. If you keep them, you pay for them in small monthly installments, for a

different points of view.

—A little history of the BRITANNICA from the days of King George III, with 70 portraits of the noted men who have made it the greatest work of its kind.

—Twenty pages of interesting dialogue telling of the unexpected interest of the BRITANNICA for women.

A clever story about the way children get interested in it.

—A clever story about the way children get interested in it.

—Portraits of the Nobel Prize winners and other famous contributors to the new Eleventh Edition.

—Nearly two hundred half tone illustrations, color plates, specimen pages and the like.

Whether you are interested in the BRITANNICA or not, you and every member of your family will thoroughly enjoy reading this book, as big as a magazine. But send at once.
